Product Information Card

EMULSION PRIMER

Acrylic fixative to water

Description

EMULSION PRIMER Wilson & Morris is an acrylic fixative concentrated high-quality water-based, consolidator and leveler for interior ceilings and walls. High penetrating power suitable for impregnation.

Use

EMULSION PRIMER Wilson & Morris can be applied on surfaces such as:

- old surfaces as a consolidator and leveler
- new surfaces as smoothing absorption

Application and preparation

Make sure all surfaces are clean and free of grease or dust.

Dilute the product in ratio of 1 to 5 with water and apply by brush.

Verify through preliminary test directly on the wall if the dilution is sufficient to ensure that does not happen the translucent effect.

In this case, proceed with a higher dilution.

Finally, wait at least four hours with any water-based product.

Stir well before using.

Do not apply to fresh slightly acidic media, allow an adequate curing time, which can range from three to five weeks.

Warnings

Do not apply if temperatures below 8 ° C and above 30 ° C, and in conditions of excessive relative humidity conditions (<80%).

The material must be protected from frost and strong temperature changes during the entire application process.

Tool cleaning

Clean the tools immediately after use with hot and running water; use a detergent for best results. It is recommended to leave the tools submerged in clean water for about 12 hours.

Coverage

10-12 sq m / l per coat. The coverage varies according to surface.
